EMERGING POWERGROUP CORPORATION

THE CORPORATION

Emerging Powergroup Corporation organization's humble beginning started as part of an engineering group designated for turn-key projects. Majority of the tasks heavily relies on searching for the latest products and equipment with a study on how it will be beneficial for the customer thru equipment effectivity, efficiency, complementary and affordability.

In 2017, after several encouragement of the international supplier from the fields of energy, oil and gas, bulk handling, environmental and safety. EPC was established.

Today, EPC proud itself as a trading company that have a direct technical knowhow on its products, including installation process and under warranty services. Complemented by an adopt technical sales and services team, the EPC Team Management;

President – Nathaniel R. Ocampo

Technical Head Sales – Miles Tawat

Technical Head Services – Alfredo Felipe

EMERGING POWERGROUP CORPORATION

VISION

A highly recognized Company known for its quality and reliable products promoted by professional of exceptional product knowledge and commitment to meet client satisfaction.

MISSION

Promote products that meets the demands and requirements of the Industry delivering on time, and has the ability to conduct a reliable aftersales service.

VALUES

EPC shall conduct business with:

- Commitment
- Transparency
- Reliability

What is aerosol?

Aerosol in general is say small the solid or the liquid particles to be dispersed in a gas formation in the stable forms system, professional refers to gas (usually for the air) for scattered medium, with solid or liquid particles of colloidal system for scattered.

The nature of the common aerosol—cloud, smoke, fog, etc.

Aerosol particles size in the more than $10^{-5} \sim 10^{-1} \mu m$ class, with gas liquidity, can spread all around obstructions submerged.

Aerosol fire extinguishing devices for the drug solid state, using electric starter (electronic ignition head) activation solid extinguisher make its produce chemical reaction, the drug through the REDOX reaction spewing out of the group is divided into aerosol out (produce owner if inert gases account for 67%, N_2 CO_2 30%).

How is works?

Conventional fire extinguishing agents use the following methods to extinguish fire:

- Suffocation method (depletion of oxygen levels in air below 15% at normal pressures extinguishes fire) ;
- Cooling method (heat absorption) ;
- Removal of fuel;

Aerosol on the other hand, extinguishes fire by inhibiting the chain chemical reactions present in combustion on a molecular level.

It removes the flame free radicals and extinguishes fire without depleting oxygen.
